Intro

I am a UX oriented web developer from Gothenburg, but currently live in Jönköping. At the moment I work as a System developer at Zmart. There I mainly do frontend work, but occasionally some backend sprinkled here and there.

Previously I studied Graphic Design and Web Development at Jönköping University, where I graduated in the summer of 2019.

I am primarily a JavaScript developer and am used to working with frameworks such as Vue and React. I also have experience creating websites using Wordpress, either with PHP or headless with the help of React and Next.js. Since I am both technical and graphical, I am comfortable working in a hybrid role. Teamwork is a strong suit of mine and I am equally as self-motivated. I am also adept at learning new technologies.

References can be delivered on request.

Skills

Developer tools

JavaScript
Vue
React
Wordpress
HTML
CSS / Sass
Node.js
Next.js
Express.js
PHP
TypeScript
Firebase
Git
SQL

UX/UI tools

Figma / Adobe XD / Sketch

Adobe InDesign
Adobe Photoshop

Language skills

Swedish - Mother tongue

English - Fluent in both speech and writing

Assignments (selected)

Movehome · 2020

A headless wordpress site, where the frontend was built with React and the library Next.js.

Bada Bing Burgers · 2020

A headless wordpress site, where the frontend was built with React and the library Next.js.

HL däck · 2019

A e-commerce site for a tire dealer in Nässjö. I was responsible for the mockup, but also worked on the development of the website. The site was made using Wordpress, WooCommerce, PHP, SCSS.

Tross Advertisement platform · 2019

Responsible for the development of Tross internal advertisement platform. The purpose of the platform was to show statistics from our Facebook and Instagram ads in a customized platform. Development involved Facebook's marketing API, Firebase for storage, and React for the Frontend.

BlastShield · 2019-2020

A web application created using React. I was responsible for customer interactions, design of mockup and development.

Employments

Zmarta Group, System Developer

Oct. 2020 - current

Working on the Zmarta platform. My work mainly involves frontend work as well as some UX, but occasionally backend.

TROSS AB, Developer

Mar. 2019 - Oct. 2020

June 2019– Oct 2020, **Developer**

An advertising agency located in Jönköping. I worked in the web department and projects mainly involved building WordPress themes, but also occasional web apps with React.

March 2019– May 2019, **Intern, web development**

I had my internship in the web department at Tross. My main task was to develop a web app using React, TypeScript and Firebase. In the project I did everything from design to implementation.

Trustcruit, Web developer

Jan. 2018 - Sep. 2018

A side job when I was not studying. At Trustcruit I worked with the development of their website, working primarily with Wordpress and JavaScript.

Jönköping University, School of Engineering

Sep. 2017 - Dec. 2017

Lab assistant in a Web developing course throughout a semester. Work involved helping students with Wordpress and JavaScript.

Hype, Art Director

Feb 2017 - Jan 2018

Hype is a student driven nonprofit advertising agency at Jönköping University where I worked as an Art Director.

Arla Foods Jönköping, cold storage

May 2017 – Aug 2017

Summer job as a cold storage employee. Drove a A1 truck and packed shipments.

Emerson Process Management, Rosemount Tank Radar AB, Mölnlycke

June 2016 – Aug 2016

Summer job as a shipping administrator. My main duties were administration and logistics.

McDonalds, Landvetter

Nov 2013 – Aug 2014

At McDonalds, I worked as a supervisor. My duties involved management of the cash register, cooking, inventory and goods reception.

Education

2016 - 2019, Jönköping University

Bachelor degree, Informatics. New Media Design

Bachelor degree in informatics. Specialization in Graphic Design and Web development.

2014 - 2016, Chalmers Tekniska Högskola

Software Engineering

Software engineering. Programming primarily with Java, but also Assembler and C.

2010 - 2013, Lerums Gymnasium

High school, Tech Media

Studied a Media Technology program. My first introduction to Adobe collection and web development.
